PROFESSIONAL EXPERIENCE

Co-Founder & Growth Product Manager, Shyne / Karatek Solutions

2024 – Present

- Own the product strategy and roadmap for Shyne, an AI-powered portfolio platform helping African creatives showcase their work and connect with opportunities.
- Led customer discovery through user interviews and market research to validate problems, prioritize opportunities, and shape the MVP.
- Designed onboarding, portfolio creation, and monetization experiences focused on improving customer activation and long-term product adoption.
- Prioritized features based on customer feedback, business goals, and market insights.
- Worked closely with engineering and design to deliver product improvements from concept through launch.
- Conducted competitive research to identify product opportunities and refine positioning.
- Used AI tools including Claude, Gemini, Cursor, and ChatGPT to accelerate product research, documentation, ideation, and prototyping.
- Built and maintained a scalable design system that improved consistency and accelerated product delivery.

Product Manager & Product Designer, Independent

2022 – Present

- Managed the strategy and execution of multiple AI, fintech, and SaaS products from product discovery through MVP delivery.
- Defined customer journeys, product workflows, feature priorities, and product roadmaps across consumer and B2B products.
- Planned and validated new product ideas through rapid prototyping, customer feedback, and iterative experimentation.

- Conducted competitive analysis and customer research to identify market opportunities and improve product decisions.
- Partnered with developers and stakeholders to translate business goals into product requirements and shipped features.
- Leveraged AI tools to automate research, documentation, content creation, and early product validation.
- Designed scalable user experiences that improved usability, customer engagement, and product consistency.
- Formulated product hypotheses, built rapid prototypes, gathered user feedback, and iterated on solutions to validate assumptions before development.

TOOLS & TECHNOLOGIES

Product & Analytics: Notion • Jira • Trello • FigJam • Google analytics

AI : Claude • Cursor • Gemini • ChatGPT

Design: Figma • Framer • Lovable

Technical: React • Next.js

PROJECT HIGHLIGHTS

Shyne — AI-Powered Portfolio Platform

Role: Growth Product Manager
